LIAISON WITH OTHER AGENCIES

1. Status:

25X1 In general, this seems to be proceeding satisfactorily. There have been no security questions raised to my knowledge during the last year. Liaison is strongest in ONE and ORR, most difficult in OSI and OCI. In some respects OOD (particularly through the efforts of [] has assumed a stronger role in working with the other related offices and agencies. OO has improved its liaison with the other agencies in the course of the last year. OO and OSO receive evaluations from the other agencies on their materials and are quite well satisfied with their response and cooperation.

2. Recent discussion with Army G-4 and arrangements resulting therefrom, show good prospect for solving the problem of Liaison with the Technical services for the purpose of obtaining domestic information required for intelligence purposes.
